

Name :
Reg No :

B

**APJ ABDUL KALAM TECHNOLOGICAL UNIVERSITY
07 THRISSUR CLUSTER**

SECOND SEMESTER M.TECH. DEGREE EXAMINATION APRIL 2018

Chemical Engineering

Process Control

07CH 6104 PROCESS DYNAMICS AND CONTROL II

Time : 3 hours

Max.Marks: 60

Answer all six questions. Part 'a' of each question is compulsory.

Answer either part 'b' or part 'c' of each question

Q.no.	Module 1	Marks
1a	Explain the assumptions involved in bubble cap gas absorber	4
	Answer b or c	
b	Derive the water side transfer equations for the temperature control in a steam jacketed kettle	5
c	Derive the steam side transfer equations for the temperature control in a steam jacketed kettle	5
Q.no.	Module 2	Marks
2a	Differentiate the characteristics of distributed and lumped parameter systems	4
	Answer b or c	
b	Derive the expression for heat conduction into a solid	5
c	Show that the transportation lag as an inherently distributed parameter system.	5
Q.no.	Module 3	Marks
3a	Explain the control schemes for heat exchanger	4

Answer b or c

- | | | |
|----------|---|----------|
| b | Briefly describe control schemes for both bottom and top product control of distillation column with neat figures | 5 |
| c | Derive the dynamics of a steam heated double pipe heat exchanger | 5 |

Q.no.	Module 4	Marks
--------------	-----------------	--------------

- | | | |
|-----------|------------------------------------|----------|
| 4a | Describe any one case study in DCS | 4 |
|-----------|------------------------------------|----------|

Answer b or c

- | | | |
|----------|--|----------|
| b | Compare centralized control system with distributed control system | 5 |
| c | Describe DCS protocols and communication in DCS | 5 |

Q.no.	Module 5	Marks
--------------	-----------------	--------------

- | | | |
|-----------|---------------------------|----------|
| 5a | Write short note on SCADA | 5 |
|-----------|---------------------------|----------|

Answer b or c

- | | | |
|----------|--|----------|
| b | Explain the basic principles of PLC controllers. | 7 |
| c | Explain fuzzy logic control with an example. | 7 |

Q.no.	Module 6	Marks
--------------	-----------------	--------------

- | | | |
|-----------|--|----------|
| 6a | Compare position form of algorithm with velocity form of PID algorithm | 5 |
|-----------|--|----------|

Answer b or c

- | | | |
|----------|---|----------|
| b | Compare and contrast Dead beat algorithm with Dahlin's algorithm deriving each. | 7 |
| c | Find the closed loop response of a first order process under proportional digital control for servo problem and find offset | 7 |
