

QuEST Global: Update regarding campus selection 2015 batch

Greetings !!!

We are extremely happy to note your interest, enthusiasm and the excitement to strengthen our relationship year on year.

As you are aware, when we had conducted the campus recruitment drive for the students of 2015 Batch during Sep-Oct last year, we (NeST Software) were on the cusp of transitioning into QuEST Global following the acquisition.

QuEST Global is a pure play engineering solutions company with a proven track record of over 17 years that serves the product development needs of high technology companies with a 7000 strong workforce spread across globally.

As with all acquisitions, the integration of two entities is fundamental for synergising the strengths. We are currently undergoing a very intensive integration phase which started in the month of Feb'15. This process is expected to continue for a period of 6 months to 1 year so as to ensure a successful transition and a robust launching pad for the future. Hence, our earlier plans which included providing orientation for the selected candidates, company familiarisation programme, induction and joining are taking longer than expected.

As per our current plan, the first batch of training is expected to start during October 2015. Information regarding the training schedule and batches will be informed by June 2015. Our orientation and Company Familiarisation Programmes will be combined and conducted during the commencement of the training.
